City Of Philadelphia
Cherelle L. Parker, Mayor

Proclamation

The City of Philadelphia holds the health and well-being of its residents to be a top priority. Everyone deserves to have the opportunity to live a full, healthy life despite any obstacles they may encounter in diagnosis or treatment. We are tremendously grateful for the many health care professionals who enhance health outcomes and improve quality of life for the residents in our city.

Neurodiagnostics is the practice of analyzing and monitoring central and peripheral nervous system function to promote the effective treatment of neurological diseases, injury and impairment. Neurodiagnostic technologists play a paramount role in the diagnosis and treatment of a variety of neurological conditions, including epilepsy, unexplained coma, sleep disorders, and spinal cord injuries. Technologists contribute to surgical treatment by monitoring the central and peripheral nervous system during high-risk procedures such as surgery for scoliosis, carotid artery disease, brain tumors, and spine trauma, thereby guarding against neurological complications during surgery and helping reduce risk of negative surgical outcomes such as paralysis or stroke.

Neurodiagnostic technologists are engaged in life-long learning, dedicated to a life of service and compassion, have the greatest respect for the worth and dignity of individuals, and are devoted to the best interest of the patient while providing the highest quality patient care.

THEREFORE…

I, Cherelle L. Parker, Mayor of the City of Philadelphia, do hereby proclaim April 19, 2026 to April 25, 2026 to be

NEURODIAGNOSTIC WEEK

in Philadelphia, and commend the neurodiagnostic technologists who play a paramount role in the diagnosis and treatment of a variety of neurological conditions, among other essential functions.

Cherelle L. Parker
Mayor

Given under my hand and the seal of the City of Philadelphia on this nineteenth day of April, two thousand and twenty-six
